

# DOCUMENTATION

## EPICTURE

Ilyes ZEDDAM

This documentation is intended for users

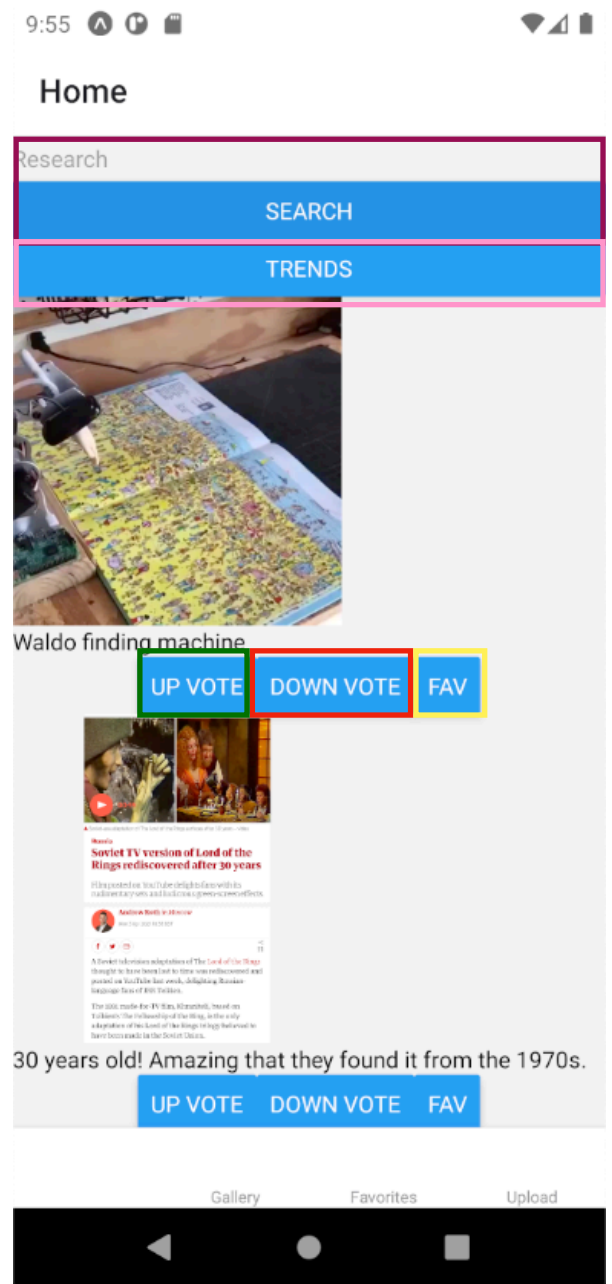

At first when you will open the application, you will be redirected to the Imgur's authorisation page, you only have to connect yourself and prove that you are not a robot if needed

Once logged in, you will get redirected to the home page with a lot of image.

You will be able to **search** images.

You can come back to **trends**.

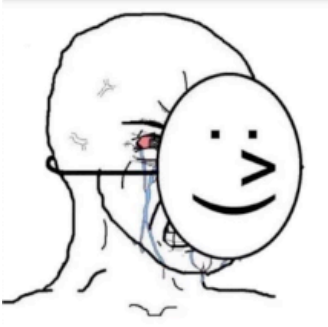

You can hit the **Up** vote and **Down** vote button to vote on images.  
You also can add an images to your favorites by hitting **fav** button.

Upload

On this page you can find your own gallery with your images uploaded. You can also update their title and description and press the update button to apply the modifications.

This page shows you all images in your favorite section.  
You can unfav them by pressing the unfav button and refresh the page, it will no longer be there.

This last page is about the upload. You can choose by adding an image from your phone by hitting the 'pick an image from the camera roll' button or by taking a picture instantly with the 'take a picture' button
